

# Ships generated waste

Glass, paper, plastic, landfill (complex material), metal, combustible waste and food waste needs to be sorted when left in the Port of Norrköping.

A waste container equipped to receive glass, paper, plastic, landfill (complex material), metal, combustible waste and food waste will be placed directly adjacent to your vessel. The waste container is dedicated to you for a disposal time of 2h.

- Landfill (complex material), combustible and food waste should be placed in plastic bags.
- Glass, paper, metal and plastic material should be placed directly in correct box in the container. Due to recycling, it is important that these materials are not placed in plastic bags.

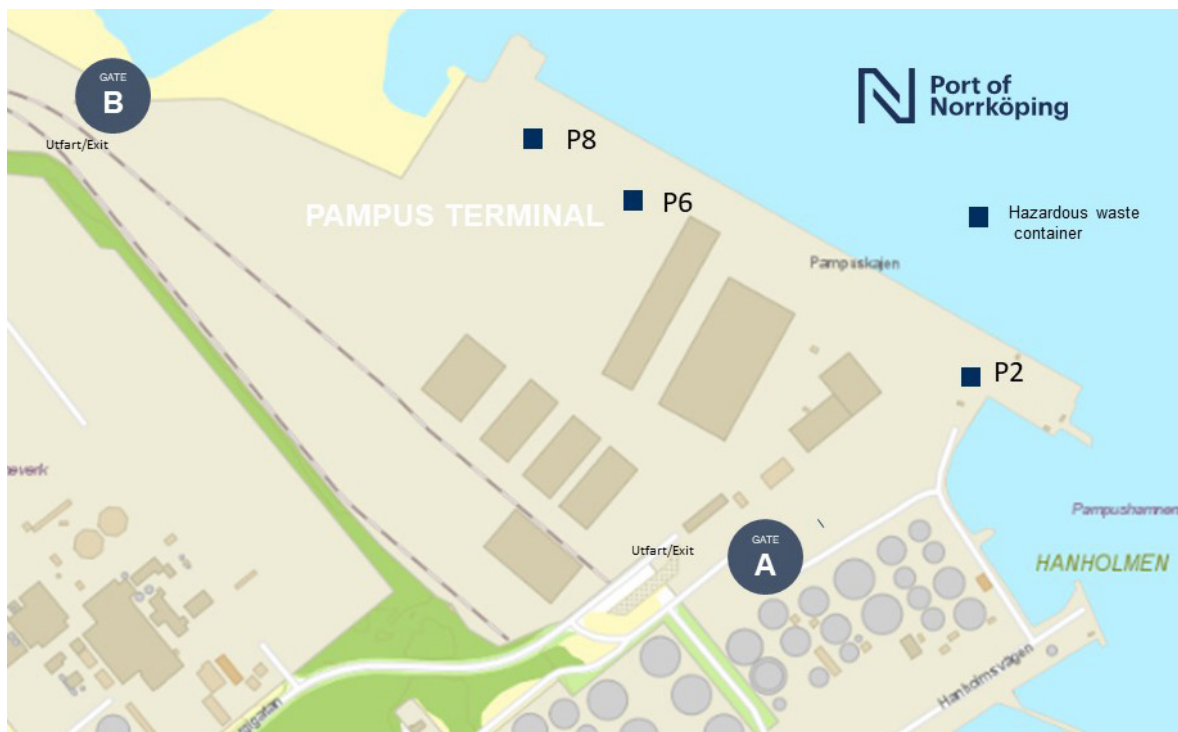

Your prebooked slot-time is:
