

CONTAINER WEB

VERSION 2025.1

WELCOME TO PORT OF NORRKÖPING
AND OUR CONTAINER TERMINAL!
IN THIS LEAFLET THIS BROCHURE WE WILL SHOW YOU
HOW OUR CONTAINER WEB E-SERVICE WORKS.

Welcome!

At the Port of Norrköping, you'll find one of Sweden's largest and most modern container terminals – digitally developed to ensure fast, safe, and efficient handling at every stage. With our smart systems and digital services, you gain full control of the entire flow, from planning to delivery. Together, we create more efficient and sustainable logistics.

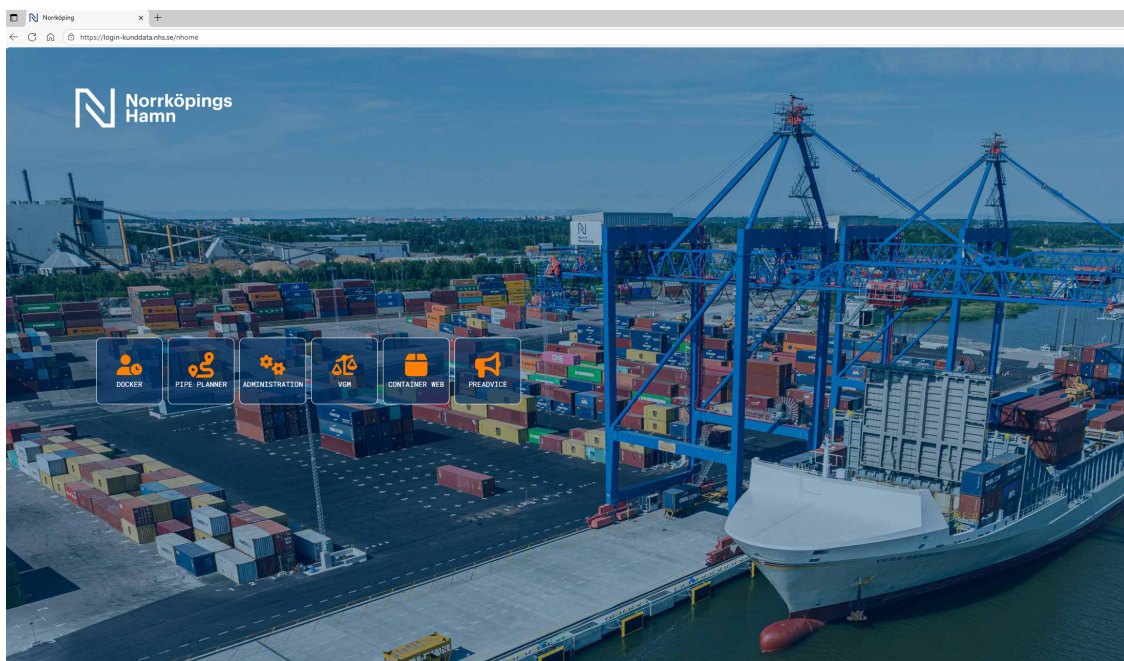

Port of Norrköping's customer portal

In our customer portal, you get access to our various e-services. If you don't already have an account, start by visiting our website at www.norrkopingshamn.se/en/e-tjanster/ and apply for an account and the service(s).

E-service Container Web

Our e-service Container Web makes container handling simple and efficient. Here, you have full control over bookings, depots, and unit status – all in one place. With real-time information and easy-to-use features, you can search, update, and track containers at any time. Our e-service gives you control, overview, and more time for other things.

Features

The Port of Norrköping's e-service offers different functions depending on your customer type and access level.

For example, a haulage company can search by container number or booking number to see whether a container has arrived and is ready for pickup. A container owner has extended rights and can both manage and create new bookings.

Users connected to a container customer in our business system, PortIT, can view and manage their depots and bookings directly in the portal.

The web portal has two access levels:

Read Information – allows you to view the following information:

- Daily line report
- Daily depot report
- Status per depot
- Loaded units in port
- Export Booking
- Release order

Update Information – allows you to both view and update information:

- Import Release
- Export Booking
- Release Order

Read information

Daily line report

View information about import and export units that have arrived at or departed from the port for the shipping line you are connected to.:

Loaded units in port

All loaded units in the port linked to the customer are displayed in this view if no booking number or goods number (BNGxx-xxx) is specified. It is also possible to view individual bookings and incoming goods numbers. The list is clickable in ****Unit No**** and ****Goods No/Booking No****. Clicking on ****Unit No**** shows all events that have occurred with the selected container, such as status changes, arrival dates, and more.

An aerial photograph of a port terminal during sunset. A large gantry crane is the central focus, with its lattice structure silhouetted against the bright orange sky. Below the crane, a container ship is docked, its deck filled with stacks of containers. Some containers are labeled 'MAERSK'. To the left, the ship's superstructure is visible, featuring a 'PD' logo. In the background, the calm water of the harbor reflects the sunset, with a distant shoreline and another ship visible on the horizon. The entire image has a warm, orange-red color cast.
